12. ECOLOGICAL INFORMATION

MOBILITY	950 is soluble in distilled water to the extent of 0.0004 i.e. 99.96% will remain intact and no further dissolution will occur. In the environment in the presence of magnesium and calcium ions, this solubility will be further considerably reduced. A precise figure cannot be given, because that will depend on the concentration of magnesium and calcium
PERSISTENCE/DEGRADABILITY	Detailed experiments have been carried out using ¹³ C isotope to determine the stability of 950 in the environment. These results yielded a stability of 99.76% over one year period. Environmental conditions had insignificant effects on the stability. Furthermore temperature has insignificant effect on the stability of the product (range of temperatures tested: 200°C to 300°C)
BIO-ACCUMULATION	Product does not bioaccumulate.
ECOTOXICITY	Not toxic to wild life.
RESULTS of PBT and vPvB Assessment PBT: N/A vPvB: N/A
